SUMMARY

- **Aspiring cybersecurity professional** with hands-on experience in **web application security testing** and **OWASP Top 10 vulnerabilities** through practical security labs and projects; **Top 5% ranked on TryHackMe**, with strong foundations in reconnaissance and vulnerability analysis.

EDUCATION

KIET Group of Institutions

Bachelor of Technology in Computer Science and Engineering

Ghaziabad, UP

October 2023 – May 2027 (Expected)

St. Tulsi Global School

Senior Secondary (Class XII)

2022 – 81%

St. Tulsi Global School

High School (Class X)

2020 – 89%

EXPERIENCE

Virtual Internship

Palo Alto Networks

April 2025 – May 2025

(Remote)

- Completed structured cybersecurity training covering network security, threat detection and security fundamentals
- Solved simulated cybersecurity challenges in a virtual lab environment
- Gained exposure to security controls, risk mitigation concepts, and cloud security fundamentals

TECHNICAL SKILLS

Cybersecurity Skills: Web Application Security Testing, OWASP Top 10 Vulnerability Assessment, Authentication & Authorization Security, Access Control Testing (IDOR, BOLA), Input Validation & Injection Testing (SQL Injection, XSS, Command Injection), Session Management & Cookie Security, API Security Testing (REST APIs)

Networking & Network Security: TCP/IP and OSI Models, HTTP/HTTPS, DNS, ARP, DHCP, Subnetting Fundamentals, Firewalls and Network Segmentation Basics, Packet Analysis and Traffic Inspection

Security Tools: Burp Suite, Nmap, Wireshark, Metasploitable, Hashcat, Netcat

Programming & Scripting: Python, JavaScript, Java

Hands-on Practice: PortSwigger Web Security Academy, Hack The Box labs, DVWA

Cloud Fundamentals: AWS Certified Cloud Practitioner, Basic understanding of IAM, S3 security concepts, EC2 Security Groups and Cloud Security Awareness

PROJECTS

Code Vulnerability Analyzer - VulnSage

- Developed a code vulnerability analyzer to identify insecure coding patterns and common security flaws
- Created an extension-based implementation to enable quick analysis directly within the codebase
- Focused on detecting issues related to input validation, insecure functions, and hardcoded values
- Designed to support secure coding practices aligned with OWASP Top 10

Custom Reconnaissance Automation Tool

- Built a personal recon automation tool to streamline information-gathering tasks during security testing
- Automates target enumeration, basic port scanning, and service discovery
- Integrates command-line security tools to reduce manual effort and speed up recon workflows

CERTIFICATIONS AND ACHIEVEMENTS

ISC2 Certified in Cybersecurity (CC) – *Expected July 2026*

TryHackMe Certified in SEC1 *Expected August 2026*

Cisco Certified in: Networking Essentials — Introduction to Cybersecurity

AWS Certified Cloud Practitioner

Winner, KIET E-Cell Endeavor 2024

Achieved a **Top 5 Team Ranking** in **Cyber Secure X CTF** (100+ teams)
